Get Cleaner Air with Honeywell Home Filtration Systems By Resideo

According to the Environmental Protection Agency, indoor air can be two to five times more polluted than outdoor air because of the pollutants that get trapped indoors. As homeowners spend more time at home the quality of the air they breathe is more important than ever.

Honeywell Home air filtration systems by Resideo can help reduce levels of dust, pollen, mold spores and other pollutants in the air flowing throughout the home. Our high-performance filters last up to three times longer than standard one-inch filters* and include high MERV-rated filter options (MERV 10-13).

Plus, homeowners can receive reminder alerts to change their filters on their Honeywell Home thermostat display or through our app – giving them a helpful tool to maintain their indoor air quality.
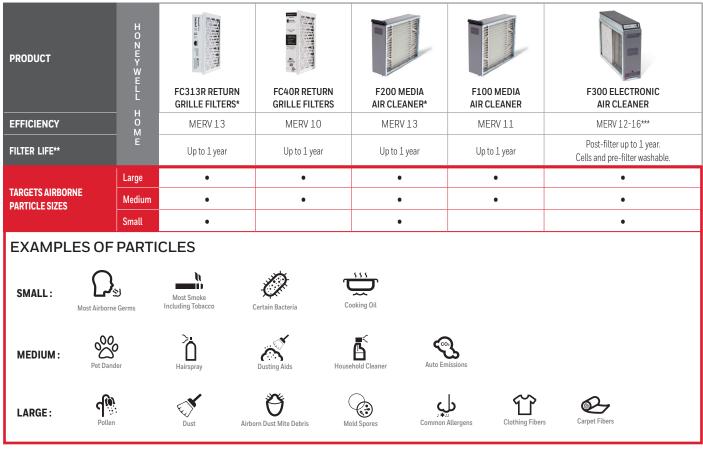

*under normal household conditions

CLEANER INDOOR AIR

- Filters for all types of systems - wide range of sizes available (including Title 24 compliant models)
- Superior performance – high capture rate of tiny particles
- Whole home solution – simple, effective solution that integrates right into equipment

- Filter change reminders – pair with Honeywell Home thermostats to receive notification when it's time to change the filter
- System performance – filtered air helps maintain better performance on HVAC system

IMPROVE INDOOR AIR QUALITY
