

REMOTELY CONTROL SECURITY PARTITIONS FOR YOUR BUSINESS

Manage Security, Access Control, and User Management with Honeywell Total Connect VISTA® Partitions

Control Is in Your Hands

Security isn't one-size-fits-all. It needs to be flexible to fit your specific needs. Honeywell Total Connect VISTA® Partition support puts you in control, letting you choose who can go where and know at what time. Have a stockroom that should be blocked off from your employees? Now you can remotely control independent areas with partition control from the palm of your hand. Whether it's for your home office or inside your commercial building, control it all with one app, whenever and wherever you want.

Global Remote Control – From Anywhere

With global remote control, you can arm or disarm all partitions at the same time, and more, from your iOS or Android device, or directly through the website.

Name Partitions

Remotely name each partition for personalization. Your partition name will show up on events and notifications making it easier to identify where events occur.

Allow or Restrict Access

Don't want some of your employees to have access to risky or high-profile areas? Allow specific users to only arm a select area, but not disarm it. Simply go to the user details to check their access and permissions, providing your business and employees with a higher level of protection.

Partition Manager

Want another user to have access to partition settings? Just set up a partition manager that has authority to activate and edit partition settings.

Remote Disarm

This Honeywell-exclusive feature lets you restrict remote users so they can't remotely disarm a partition. This prevents an accidental disarming in a high-profile area, such as a server room when using the global disarm feature.

Get Alerts on Your Mobile Device

Receive personalized, real-time alerts on partition activity so you know the exact moment something happens. You determine what partitions you want to receive alerts on and the specific times.

Upgrade with Ease

If these features interest you, there's no new hardware or installation needed. If VISTA partitions are programmed in your security panel, it will appear in your Honeywell Total Connect 2.0 settings.

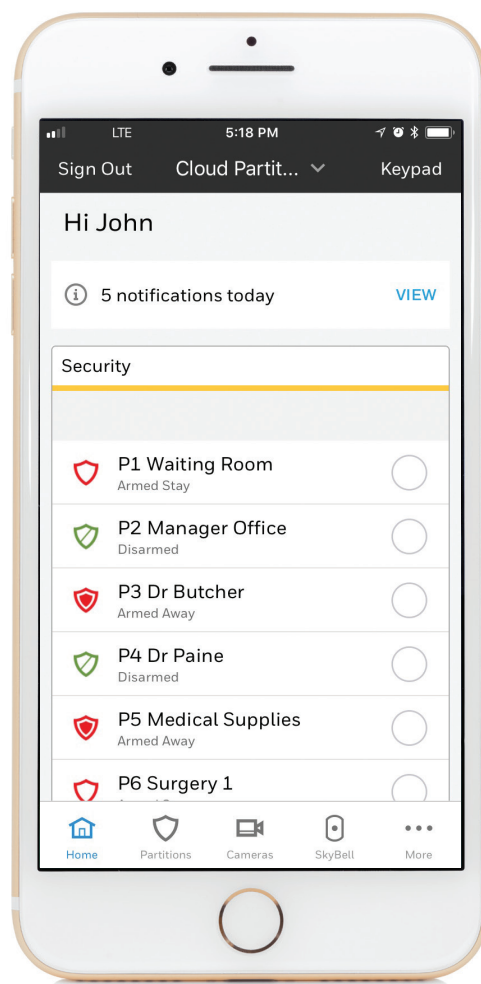

Secure Certain Areas of a Home Office or Multi-Dwelling

Just like for businesses, partitions can also help at home. Is your business office downstairs? Grant user control to employees for downstairs, and family members for upstairs. Renting? You can securely separate the rental portion of your home and assign control to a renter for only their portion of the property.

Remotely control security for up to eight VISTA partitions - anytime, anywhere.

Honeywell Total Connect Partitions Provide More Capabilities and Control
